Haulage Instructions:

As your integrated logistics provider, A. P. Moller – Maersk would like to inform you of the changes in import container release process at the Port of Rotterdam. We have previously communicated that the implementation of Secure Chain, an extension to the existing Portbase services used for container release, is underway. Throughout last year, we have rolled out Secure Chain container release for different origins and we would now like to inform you that as of 3 February 2025, container release through Secure Chain will become the requirement for collecting all types of import containers from all origins.
